

HOW TO GET PEOPLE WITH ZERO KNOWLEDGE OF PGP ENCRYPTION TO SEND ME A PGP-ENCRYPTED MESSAGE?

Grab public key and fingerprint:

1. Get your public key block (a block of letters and numbers that represent you PGP key). It should look something like this:

```
publickey.cyberhisham@protonmail.com.asc
-----BEGIN PGP PUBLIC KEY BLOCK-----
Version: OpenPGP.js v4.4.10
Comment: https://openpgpjs.org

-----END PGP PUBLIC KEY BLOCK-----
```

(Note: never share your private key with anyone)

2. Get your fingerprint (a series of numbers and letters that help your people verify it's really you sending the email)

Create an account at Hawkpost.co

1. Go to Hawkpost.co
2. Follow the instructions to create a new account
3. Once logged in: go to Settings > Fill in your Profile > and Save
4. Now always under Settings click on Keys
5. Copy and paste the text from your public key file in the "Public key" field
6. Now copy your fingerprint and paste in the Fingerprint field.

UPDATE YOUR SETTINGS

You can provide the public key in a static way or provide a link to your key in a public key server so we can fetch it for you (recommended).
To verify the log of the last changes to your key please click [here](#).

Public key: Key server URL:

Fingerprint:
9F0642CB902990649DF225162C52FFD7B305AE78

Save

6. Click Save

Publish a link for people to reach you confidentially

1. Now click Boxes > New Box

2. Copy the link to your Hawkpost "Box" and share it:
You can publish it or add it to your email signature

3. People wanting to send you an encrypted email would only have to open the link. It leads to a webpage that allows them to write their message or send a file.

The image shows a web interface for Hawkpost, a secure email service. At the top, the word "HAWKPOST" is written in large, stylized, black Hebrew characters. Below this, the heading "Sending your confidential information safely" is displayed in a bold, black font. A link "What is Hawkpost?" is provided in a smaller, teal font. The main section is titled "Compose new message". It shows the recipient as "Cyber [redacted] ([redacted]@protonmail.com)" and the organization as "None". A key fingerprint is listed: "9F0642CB902990649DF225162C52FFD7B305AE78". Below this, there is a section for writing the message, with a note: "All the contents, inserted into this box, will be encrypted with the recipient's public key before leaving this computer." There are two orange arrows pointing to buttons: "SEND TEXT" and "SEND FILE". The "SEND FILE" button is positioned above a checkbox labeled "Send local file". At the bottom, a large teal button says "Encrypt and Send".
