

On your phone

1/ Go to your app store

2/ Search for “Outline Jigsaw” and install the app (verify that the developer is “Jigsaw Operations LLC”).

The app logo looks like this:

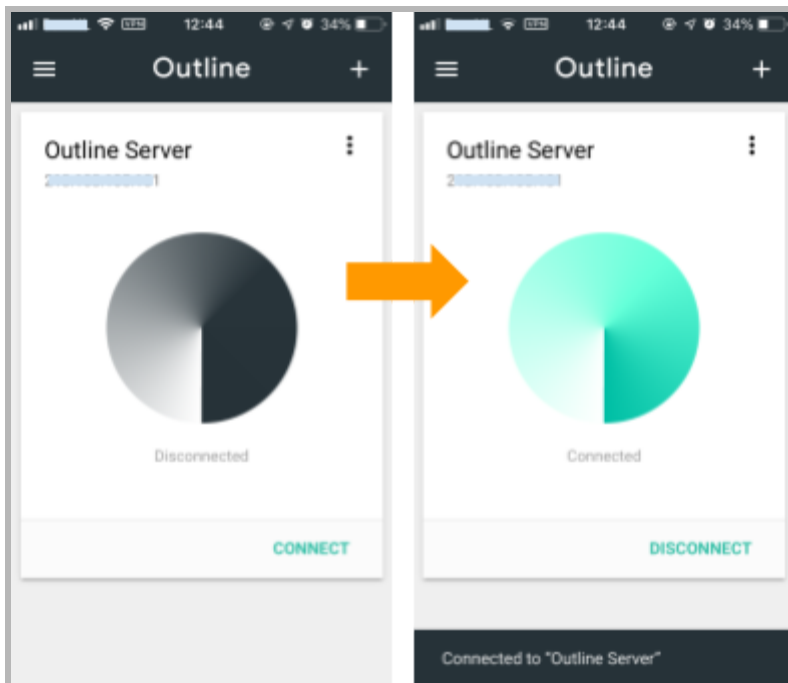

3/ When install is complete, open your Outline app.

4/ Click on the + sign in the upper right corner

5/ Add the access key by copying and pasting the string of numbers, symbols and letters that the trainers have sent you and then tap ADD SERVER

6/ You can then connect your device to the VPN server by tapping Connect

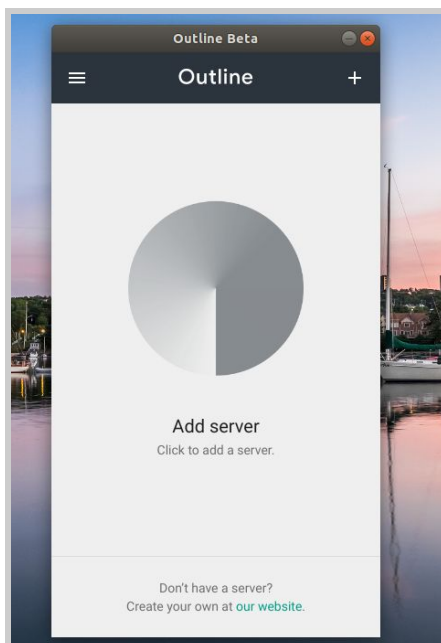

On your computer

1/ go to <https://www.getoutline.org/>

2/ Scroll down to download the Outline client:

3/ When download is complete, open the Outline Client (For Linux users, after the download is complete, right-click the Outline-Client.AppImage file > Properties > Under Permissions tab, check "Allow executing file as program".)

4/ Click on the + sign in the upper right corner

5/ Add the access key by copying and pasting the string of numbers, symbols and letters that the trainers have sent you.

6/ You can then connect your device to the VPN server by tapping Connect
